

CCNP (Routing and Switching) Training Course

Courses
that make
you 'Job
Ready'

Cisco Certified Network Professional (CCNP) Routing and Switching is a certification program that help gain expertise your networking knowledge and increase your chances of finding a Job in the data networking industry and its associate organizations. **Cisco Certified Network Professional (CCNP) Routing and Switching (R&S) certification validates the ability to plan, implement, verify and troubleshoot local and wide-area enterprise networks.** It also helps to collaborate with engineers working on other networking areas such as advanced security, voice, wireless and video applications.

On completion of this course, one can take up roles such as network engineer, support engineer or systems engineer. The knowledge from this course is relevant in the physical networks of today and the virtualized network functions of tomorrow. The training benefits the aspirants to take up with the CCNP R&S exam after the completion of training

Course Contents

- **CCNP Switch**
 - Building Campus Networks
 - Designing Campus Networks
 - Campus Network Services
 - Securing Switched Networks
- **CCNP Route**
 - EIGRP, OSPF and BGP
 - IPv6, IPv4 or IPv6 based re-distribution plans
 - Layer 3 path control
 - Implement basic teleworker and branch services
- **CCNP troubleshoot**
 - Maintain and Monitor Network Performance
 - Troubleshooting switch based features
 - Troubleshooting IPv4, IPv6 routing protocols and IP services in a multiprotocol system network
 - Troubleshooting router and switch device hardening

Course Duration

- 60 hrs

Training Venues

- **Classroom session at client site (Mon—Friday)**
- **Classroom sessions (Sat & Sun)**
Career Booster Technologies
No.147/10, 4th Floor Krishna Mansion
9th Cross, JP Nagar 1st Phase
Bangalore - 560078.
- **On-line sessions (Mon to Fri)**
Web conference tool (Audio and Video)
